

## Setting Up Your Gem Case

Thank you for purchasing from Klassic Gem Cuisine, the ultimate in convenience when entertaining.

This Gem Case turns into a attractive display in a few simple steps.

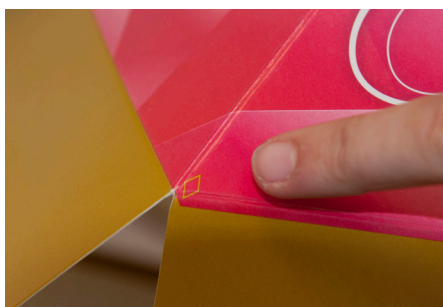

**1** Remove plastic film and lift the lid.

**2** Remove the *Golden Crown* from middle of the base tray and fold the triangular 'Klassic' tabs outward. The tabs should be in an upright position after folding them outward.

**3** Lift inserts straight up and set them to the side.

**4** Locate 3 small, gold diamonds printed on every other corner of the lid's six corners.

5

Fold the lid as follows:

a

Bring two of the 3 small gold diamonds, as identified in step 4, together.

b

Push the third gold diamond inward, folding the lid into a tri-fold display.

6

While continuing to hold the display at its top in an upside-down position, locate each of the 6 tabs at the base of the folded lid and fold them outward. Once folded, these 6 tabs will form a flat, triangular base.

7

Place the flat triangular base into the triangular opening in the center of the tray. Secure the display by folding the “Klassic” tabs inward.

8

While holding the trifold display top insert folded Golden Crown into top of the display.

**Special notes for your fresh gourmet bites:**

*Please keep refrigerated and remove for serving 15 minutes before serving so the “Gem Bites” have time to come to room temperature and release their full flavor and aroma.*

*Our “Gems” are best if consumed within 3 hours of serving.*
